-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. Claims 1 to 33 are presented for examination.

Information Disclosure Statement

2. The references listed in the information disclosure statement submitted on 9-26-2003 have been considered by the examiner (see attached PTO-1449).

Specification

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1 to 7 and 13 to 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because the recited phrase "a controller adapted" recited on line 12 creates a vague and indefinite claim language. Claims 2 to 7 are also rejected due to their dependence on claim 1. Claim 13 recites similar language as claim 1 and is also rejected along with the dependent claims under 35 U.S.C. 112 second paragraph.

Allowable Subject Matter

6. Claims 8 to 12, and 20 to 33 are allowed.

7. Claims 1 to 7 and 13 to 19 would be allowable once the 112 second paragraph rejection is overcome.

8. The following is a statement of reasons for the indication of allowable subject matter: the primary reason for allowance of the claims, is the inclusion of the novel elements of asserting a failure indication when the number of symbols in error in the first detected sequence is greater than the predetermined number and identifying corresponding symbols of the first and second detected sequences that differ. The prior art made of record, taken alone or in combination fails to specifically teach or fairly suggest or render obvious the novel element stated above as recited in the independent claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lee (USP 6604220 B1) discloses a disk drive that includes a multiple-input sequence detector for detecting an estimated data sequence and an error correction (ECC) decoder for decoding the estimated data sequence into a codeword.

Yang (USP 6192499 B1) discloses a hard disk drive that includes an ECC detection and correction circuit for detecting and correcting errors beyond one sector.
